Office Action Summary

Art Unit:

Claims 1-20 are presented for examination

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103 as being unpatentable over Kotuby.

Kotuby teaches the use of a dispensing system for dispensing pharmaceutical formulations in a droplet form. Such system is taught to be used for the dispense of ophthalmic formulations. The above reference makes clear that the claimed dispensing system has been used previously for the delivery of ophthalmic formulations. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-20 are properly rejected under 35 U.S.C. 103.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Fay whose telephone number is (703) 308-4604.
